

Counties Manukau Health (CM Health) represents the heart of the people of South Auckland. With over 167 ethnicities, and the largest Maaori and Pasifika population in Auckland, it is truly a culturally diverse community.

Living our values, CM Health is dedicated to having a workforce that reflects our population, ensuring health and care is both equitable and equal for all. We remain committed to growing our own, to walking the talk, and delivering care to our community.

If where you work matters, and what you do matters, then join us at CM Health. Because you matter to us!

ONGOING SUPPORT

Committed to making our graduate nurses feel supported. Our senior nurses and your preceptors have all been where you are. They know the organisation inside out and understand the challenges and opportunities

Additional cultural support is available for our Maaori and Pacifica graduates provided by our senior nursing colleagues.

Relocation grants are considered for candidates looking to make a positive move and work with us to improve health outcomes for our communities in South Auckland.

The NETP team includes a Nurse Coordinator/Nurse Educator and four Clinical Coaches who work closely with the senior nursing staff in all clinical areas to support the graduate nurse throughout the duration of their first year of practice

NESP

Mental Health & Addiction services at CM Health provide a wide diversity of learning opportunities for staff: with inpatient and community services, infant, child, youth, adult and older adult focussed areas of practice as well as specialist teams.

The linking of acute, as well as short to longer term care, with our communities and to Primary Care, is a key area of development. A strong focus on supporting Maaori and Pasifika populations provides exciting opportunities for new staff.

If you are interested in working in a service that is future focussed, addresses the needs of our populations and is determined to make a difference by addressing health equity, then CM Health is the place for you.

Opportunities to work in two diverse areas of MH practice are key to the graduate experience.

Make a difference in our community. Choose CM Health and Choose Mental Health.

Mental Health and Addictions

Five Community MH centres
 Inpatient acute and recovery units
 Older person's inpatient and community services
 Specialist services with Child and Youth
 Culturally focused teams
 Acute community teams
